

sauvignon blanc

2010 curicó valley, chile

made with organic grapes

While taking advantage of the excellent conditions of Chile and maintaining the old traditions in the land and culture, Culpeo has transformed into one of the most prominent Chilean brands in organic wine production. All vineyards are grown in total absence of chemical pesticides and herbicides. This Sauvignon Blanc with a light yellow color and green shades displays citric fruit aromas with a mineral hint. Ideal to be served as aperitive with vegetarian gastronomy or seafood and fish.
